PROJECTS

Cycling App *01/2020*	**Twitter Clone** *12/2019*
Create a web based VueJS application that will be used by sales representatives in ClearVision to help keep track of their sales cycles. It maintains their schedule and calendars and directs them to their destinations for each day.	Created a Cloud based applications that acts and functions in the same manner as Twitter. It features a scaled-out server architecture using NodeJS backend with Express, MongoDB, and jQuery frontend. It focuses on being to handle many different requests simultaneously.

RELEVANT CLASSES

Cloud Computing *08/2019*	**Cyber Security** *08/2019*	**Analysis of Algorithms** *12/2018*
Learned how to apply cloud technologies such as queues, load balancers, MongoDB clustering, memcached, etc.	Enhanced coding abilities by following certain patterns to write safe code. Learn known vulnerabilities in systems in order to code against them.	Learned about Algorithm designs such as sorting methods, graphing algorithms, and dynamic programming.
